August 24th, 2020 - Freelance Web Designer Position - Crystal Clear Solutions

To whom it may concern:

My name is Heyward Smith and I recently graduated from the Georgia Institute of Technology in May with a B.S. in Industrial Design. I was recently browsing job postings and was very excited to see a web design internship available near Savannah.

This position sounds like a great opportunity and I would like to list my qualifications for this position. I have had personal and professional experience with front-end web design over the last few years and have built up a basic knowledge of web technologies (HTML5, JS, CSS) that I am eager to expand. I have had exposure to website builders and front-end frameworks such as AngularJS and Bootstrap, and I am interested specifically in using and learning more about Wordpress, since so many websites are built with it. I have also used Python and PHP for small projects and understand the basics, and would enjoy developing these skills further.

As for creating and styling content, I am proud to say that I have worked with an experienced developer on two freelance projects designing layout and styling, as well as many personal webapps. You can view my work in more detail on my portfolio, heymac.github.io. During my college education I extensively used Adobe Indesign, Photoshop, and Illustrator, to create presentations and graphics for various projects, and during my freelance work I used Figma and other software to create prototypes that could be shown to clients and edited by col-leagues.

This internship really appeals to me because of how much more experience and knowledge I stand to gain. I hope that this can be a great step forward in my career and I appreciate your consideration for me in this posi-tion. I look forward to discussing this opportunity further. Thank you.

Sincerely,
